Application Instructions

These instructions are provided to assist facilities in completing the *National Environmental Achievement Track* application. The application consists of five sections:

- Section A – Tell us about your facility.
- Section B – Tell us about your Environmental Management System (EMS).
- Section C – Tell us about your past achievements and future commitments.
- Section D – Tell us about your public outreach and reporting.
- Section E – Read and sign the *Application and Participant Statement*.

The first four sections (Section A through Section D) allow applicants to tell EPA about their facility and qualifications. By completing and signing the *Application and Participation Statement* (Section E), applicants certify that they have read, understand, and meet the terms, conditions and requirements for participation established in the *National Achievement Track Program Description*. The *Program Description* will be contained in a Federal Register Notice and is available through the EPA Performance Track Website or from the Performance Track Information Center at (toll free) 1-888-339-PTRK (7875).

The application form is designed to minimize the burden for applicants while providing sufficient information for EPA to evaluate whether a facility meets the program criteria. The instructions follow the same order as the application form.

Overview of the National Environmental Performance Track

The National Environmental Performance Track is designed to recognize and encourage top environmental performers—those who go beyond compliance with regulatory requirements—to attain levels of environmental performance and management that benefit people and communities.

EPA is implementing the National Environmental Performance Track program at two levels. The first level, the *National Environmental Achievement Track* (Achievement Track), is designed to recognize facilities that consistently meet their legal requirements and have implemented high-quality environmental management systems, as well as to encourage them to achieve more by; continuously improving their environmental performance and informing and involving the public.

The second level, the *National Environmental Stewardship Track*, is under development. It is being designed to recognize and encourage broader and higher levels of voluntary environmental performance than those expected under the Achievement Track. These may include improvement in several categories of environmental performance; a focus on environmental management and performance with regard to customers, suppliers, and transporters; attention to product stewardship; and even better community engagement and public outreach.

The following instructions should be used by facilities to apply for acceptance into the *National Environmental Achievement Track*. EPA does not believe any Confidential Business Information (CBI) needs to be submitted in a completed application and asks firms not to submit any information they consider Confidential on their application.

Section Instructions

Instructions for each section of the application, including the cover page, are provided below.

Cover Page

Facility Name. Provide the name of the facility applying for admission on the first line.

Name of Parent Company (if any). Fill in the name of the parent company, if the facility is owned by another company, is a division of a larger company, or if another company retains overall responsibility for the applicant facility.

Street address. List the street address of the facility.

Street address (cont). Use this line to complete the street address, if necessary.

City/State/Zip Code. List the city, state and zip code of where the facility is located.

Give us information about your contact person for the National Environmental Achievement Track Program

Name. Enter the name of the individual who may be contacted for additional information concerning the facility's application.

Title. Give the title of the contact person.

Phone: List the telephone number of the contact person (including area code).

Fax: Give the fax number for the contact person (including area code).

E-mail: List the e-mail address (if any) for the contact person.

Section A

Tell us about your facility.

1. What do you do or make at your facility?

Briefly describe the primary products that are manufactured, prepared or assembled at your facility. For non-manufacturing facilities, describe the services you provide or activities you conduct.

2. List the Standard Industrial Classification (SIC) codes or North American Industrial Classification System (NAICS) codes that you use to classify business at your facility.

If the facility has more than one SIC or NAICS code, please list the primary code for the facility first, followed by all other codes. If you do not know your facility's classification code, please consult the following website: <http://www.census.gov/epcd/www/naicstab.htm>. Note: The NAICS is a new classification that is replacing the SIC code system.

3. Does your company meet the Small Business Administration definition of a small business for your sector?

Check yes or no. For purposes of this question, your company is the parent company (if any) identified on the Cover Page of your application. If no parent company is identified, then answer the question based on the size of your facility. If you do not know if your company meets the Small Business Administration (SBA) definition, you may contact your local SBA office or consult <http://www.sba.gov/regulations/siccodes/> or <http://www.sba.gov/size/Guide.html>.

4. How many employees (full-time equivalents) currently work at your facility?

Check the box that best corresponds to the number of full-time equivalent (FTE) employees working at the facility. A FTE represents 2,000 hours per year. To calculate the number of FTEs, add the total hours worked during the calendar year by all employees, including part-time and seasonal employees, and divide the total by 2,000.

5. Does your facility have an EPA ID number(s)?

Check yes or no.

If you checked yes, enter the facility's EPA ID number in the space provided. Your facility may have more than one number. If there is not enough room provided in the space to the right, list the additional IDs on a separate piece of paper.

6. Identify the environmental requirements that apply to your facility. Use the *Environmental Requirements Checklist*, at the back of the instructions, as a reference. List your requirements to the right or enclose a completed *Checklist* with your application.

This question asks you to identify the significant applicable major federal, state, tribal and local environmental requirements at your facility. An *Environmental Requirements Checklist* is provided at the end of the instructions for your reference. Use the *Checklist* to help identify the requirements that may be applicable at your facility. The *Checklist* is not intended to be an exhaustive list but rather as a reference to a number of federal, state, tribal, and local requirements that are applicable to a wide range of facilities.

You may list the applicable requirements on the lines provided (attach additional sheets of paper, if necessary) or you may complete the *Checklist*, including the facility identification information at the top, and enclose the *Checklist* with your application.

7. Check the appropriate box in the right-hand column.

Check the box that corresponds to how you answered Question 6—either by listing above or by enclosing the *Checklist* with your application. This will help determine if your application is complete (i.e., whether you have enclosed the optional *Checklist* with your application).

8. Optional: Is there anything else you would like to tell us about your facility?

This question is optional. Use this section to share other information about your facility's environmental accomplishments and activities that believe would be useful. You may attach additional sheets.

Section B

Tell us about your EMS.

In this section, you tell us about the EMS that your facility has in place¹ and that it meets specific Achievement Track elements. The specific EMS elements are described in the *National Environmental Achievement Track Program Description*. References to the appropriate section of the *Program Description* are given for each question. Only those EMS's that meet each of the program's elements qualify for the Achievement Track. (See *National Environmental Achievement Track Program Description*, Section II.A.1, “Environmental Management System (EMS)” for a full description of program elements).

1. Check yes if your EMS meets the requirements for each element below as defined in the instructions.

a. Environmental policy

Check **yes**, if your EMS meets the elements specified for the *Policy* element as defined in Section II.A.1 (Environmental Management Systems) of the *Program Description*.

b. Planning

Check **yes**, if your EMS meets the elements specified for the *Planning* element as defined in Section II.A.1 (Environmental Management Systems) of the *Program Description*.

c. Implementation and operation

Check **yes**, if your EMS meets the elements specified for the *Implementation and operation* element as defined in Section II.A.1 (Environmental Management Systems) of the *Program Description*.

d. Checking and corrective action

Check **yes**, if your EMS meets the elements specified for the *Checking and corrective action*

¹For purposes of the Achievement Track, an EMS represents an organization's systematic effort to meet its environmental requirements, including maintaining compliance, and achieving performance objectives that may be related to unregulated aspects of the organization's activities.

element as defined in Section II.A.1 (Environmental Management Systems) of the *Program Description*.

e. Management review

Check **yes**, if your EMS meets the elements specified for the *Management review* element as defined in Section II.A.1 (Environmental Management Systems) of the *Program Description*.

2. Have you completed at least one EMS cycle (Plan-Do-Check-Act)?

Check yes if your EMS has been in place through at least one “Plan-Do-Check-Act” cycle. A complete cycle includes:

- defining and documenting your EMS;
- identifying significant environmental aspects and legal requirements;
- setting measurable objectives and targets;
- establishing roles and responsibilities for meeting EMS and legal requirements;
- conducting training for personnel on EMS and legal requirements
- undertaking steps to meet the established objectives and targets;
- evaluating your progress in meeting the established objectives and targets;
- conducting an EMS audit
- completing a compliance audit
- correcting any areas of EMS non-conformance or legal non-compliance;
- completing a management review of the EMS, and its results.

3. Did this cycle include both an EMS and a compliance audit?

Indicate if you have completed an audit of the EMS and your compliance with applicable federal, state, tribal and local environmental requirements.

4. Have you completed an objective self-assessment or third-party assessment of your EMS?

Check the box corresponding to whether you completed an objective self-assessment or a third-party assessment.

If you completed a **self-assessment**, indicate the protocol you used by checking one of the boxes under “Self-assessment.”

- GEMI = Global Environmental Management Initiative (<http://www.gemi.org>)
- CEMP = Code of environmental Management Principles Self-Assessment Matrix (<http://es.epa.gov/oeca/cemp/cemptoc.html>)
- Other = Please fill in the blank with the method used.

If you completed a **third-party assessment**, indicate the protocol used by checking one of the boxes under “Third-party assessment.”

- ISO 14001 Certification = International Standards Organization 14001 Certification (<http://www.iso.ch/>)
- Other = Please fill in the blank with the method used.

Section C

*Tell us about your past achievements
and future commitments.*

Each applicant demonstrates past achievements and commits to report on future improvements. To demonstrate past performance, select a minimum of two environmental aspects from any of the categories in the *Environmental Performance Table* (at the end of the instructions) and describe the improvements in your facility’s performance during the current year and proceeding year. Small facilities have the option of documenting improvement for a minimum of one environmental aspect from any category.² Facilities are encouraged to document performance achievements beyond the minimum. See *National Environmental Achievement Track Program Description*, Section II.A.2, “Demonstrated Environmental Achievements and Commitment to Continued Improvement” for a full description of program criteria.

The Achievement Track program uses the terms *category* and *aspect* to help quantify environmental performance:

A *Category* is a class of environmental impacts (e.g., air emissions).

An *Aspect* is an element of an organization’s activities, products, or services that interacts with the environment.

Use the *Environmental Performance Table* (located at the end of these instructions which lists categories, aspects, and likely units of measurement) to report on performance.

² EPA recognizes that, depending on the nature and extent of a facility’s operations, a small facility may have fewer environmental aspects as well as more limited resources for measuring and committing to specific improvements in performance. For purposes of this program, a facility will be considered to be a “small” facility if the company as a whole is a small business as defined by the Small Business Administration (see FR 30386, Vol. 65, No 94, May 15, 2000) and if the facility itself employs fewer than fifty full-time equivalent employees. Your facility is small if, in Section A, you checked “yes” to Question 3 and “fewer than 50” to Question 4.

1. Describe your past achievements for at least two environmental aspects. If you need more space than is provided, attach copies of this page.

Note to small facilities: If you qualify as a small facility as defined in the instructions, you need to report past achievement for at least one environmental aspect.

You qualify as a small facility if you answered “yes” to Question 3 in Section A (“Does your company meet the Small Business Administration Definition of a Small Business for Your Sector?”) and if you have fewer than 50 full-time equivalent employees at your facility.

First aspect you've selected

“What aspect have you selected?”

Write the name of the aspect (for example, energy use) in the gray area.

What was the previous level (2 years ago)?

In the gray area, write in the quantity and the units of the aspect that you measured two years ago. Use an annual quantity if possible. You may report an absolute quantity for the aspect, for example, 800,000 MMBTU, or you may report a quantity in terms of output or production, for example, 20 MMBTU per car produced.

What is the current level?

In the gray area, write in the corresponding quantity and the units of the aspect for the most recent 12- month period for which you have data. Again, you may report an absolute quantity for the aspect, for example, 864,000 MMBTU, or you may report a quantity in terms of output or production, for example, 18 MMBTU per car. Whether you chose to report in absolute quantities or in terms of output or production, you should express the quantity in the same units for the previous level and for the current level.

I. How is the current level an improvement over the previous level?

Use this space to clarify or explain why you consider the reported current quantity an improvement. For example, the current quantity could show a slight increase from past performance, but you may want to explain that your production has doubled over the same time period.

ii. How did you achieve this improvement?

Use this space to briefly describe what actions you took that caused the performance improvements you reported above. Examples of these actions are pollution prevention strategies, equipment upgrades, employee training, or process changes. Be as specific as you can. If the performance improvements were in part the result of your participation in a voluntary program sponsored by the federal government, your state or local government, or a non-governmental organization, mention that program here.

Complete both Aspect boxes under Question 1, unless you are a small facility. If you are a small facility, you can choose to complete only one.

You can report on more than two aspects (feel free to do so) by copying page 5 or 6 and attaching the extra sheets to your completed application.

2. Select at least four environmental aspects (no more than two from any one category) from the Environmental Performance Table in the instructions and then tell us about your future commitments. If you need more space than is provided, attach copies of this page.

Note to small facilities: If you are a small facility, you need to make commitments for at least two environmental aspects in two different categories.

This question asks you to commit to specific improvement commitments over the next three years. Your identified commitments will not rely on any actions that represent compliance with existing legal requirements at the federal, state, tribal, or local levels. These improvements will represent actions taken by a facility that go beyond existing legal requirements.

First aspect you've selected

a. What is the aspect?

Write the aspect you selected from the *Environmental Performance Table*, included at the back of these instructions.

b. Is this aspect identified as significant in your EMS?

Choose significant aspects for future commitments that are related to the objectives and targets in your EMS. Refer to the *Planning* portion of your EMS(See *National Environmental Achievement Track Program Description*, Section II.A.2, “Demonstrated Environmental Achievements and Commitment to Continued Improvement” for a full description of program requirements.

Check yes if this aspect is one of those identified as a significant aspect. Otherwise, check no.

c. What is the current level? You may choose to state this as an absolute value or in terms of units of production or output.

Write in the quantity and the units of the aspect for the most recent 12-month period for which you have data. Check the box next to Option A if you are providing an absolute value and write the quantity and units on the line to the right, for example, 864,000 MMBTU. Check the box next to Option B if you are providing this level in terms of units of production or output and write the quantity on the line to the right, for example, 18 MMBTU per car.

d. What is the improvement you are committing to over the next three years? You may choose to state this as an absolute value or in terms of units of production or output.

Write in the *difference* between your current level of the aspect and the future level of the aspect you are committing to. Check the box next to Option A if you are providing this level as an absolute value and write the quantity and units on the line to the right, for example, 691,200 MMBTU. Check the box next to Option B if you will state this level in terms of units of production or output and write the quantity on the line to the right, for example, 14.4 MMBTU per car.

e. How will you achieve this improvement?

Use this space to briefly describe what actions you will take to improve your performance in this aspect. Examples of these actions are equipment upgrades, employee training, and process changes. Be as specific as you can. If the performance improvements are linked to commitments you have made in a voluntary program sponsored by the federal government, your state or local government, or a non-governmental organization, mention that program here.

Complete the subsections for the second, third, and fourth aspect. You can choose to complete only the subsection for the second aspect if you are a small facility. You may attach additional sheets if you are making additional commitments.

Section D

Tell us about your public outreach and reporting.

Use this section to describe your commitment to public outreach. See *National Environmental Achievement Track Program Description*, Section II.A.3, “Public Outreach and Performance Reporting” for a full description of program requirements.

1. How do you identify and respond to community concerns?

Briefly describe.

2. How do you inform community members of important matters that affect them?

Briefly describe.

3. How will you make the Achievement Track Annual Performance Report available to the public?

Indicate here the likely means of distributing your Annual Performance Report by checking one, or more, of the boxes. If using a website, provide the URL. If 'Other', please describe what will be done.

4. Are there any ongoing citizen suits against your facility?

Check yes or no. If yes, briefly describe the nature of the citizen suit or legal action and the action(s) current status.

5. List references below.

References may be called to learn more about the facility. Please write in the organization that the person represents, his or her name, and telephone number. A person who is associated with your facility and who is also a member of a community/citizen group cannot be used as a reference. See below for further explanation about group categories.

- a. ***Representative of a community/citizen group.*** Name a person representing a community/citizen group based in the facility's community. Examples include civic groups, neighborhood associations, local chapters of environmental groups, and community development organizations. Consider choosing a reference from a community/citizen group that is familiar with your facility either through proximity (e.g., a group representing an

adjacent neighborhood) or other involvement with the facility (e.g., a group with representation on a facility's community advisory committee).

b. ***State/tribal/local regulator.*** Name a person who is a regulator familiar with the facility. This person need not be associated with an environmental regulatory agency or department. For example, other appropriate regulatory agencies include those associated with public health or housing.

c. ***Other community/local reference.*** Name a person who is either an additional reference from one of the two categories above or a reference familiar with your facility and who represents another type of organization in the community. Potential examples include a member of the Local Emergency Planning Committee (LEPC), a local labor union member, a representative from the local Chamber of Commerce, a university faculty member, or another business owner or operator.

Section E

*Read and Sign the Application and
Participation Statement*

A full and complete Application for the Achievement Track Program consists of a fully completed Application Form, a completed Environmental Requirements Checklist (if used), and a signed Achievement Track Program Application and Participation Statement.

When you sign the Application and Participation Statement, it means that you are familiar with and agree to fulfill the requirements of the program. It also means that all the information you have included and statements you have made in your Application are true and accurate, in particular that your facility's EMS meets all the specified requirements, and that you will keep the EMS in place for the duration of your facility's participation in the program; that your facility has conducted an objective assessment of compliance with all environmental requirements that apply to you, and that you have corrected any noncompliance you may have found; and that based on your compliance assessment, your facility is currently in compliance with applicable federal, state, tribal and local environmental requirements. It also means that you understand that EPA's decision to accept or remove you from the program is wholly discretionary with the Agency, and that you do not have a right to challenge EPA's decision; and that your participation in the program is not relevant to any issue of law or fact in any legal enforcement proceeding for violations of environmental requirements.

In evaluating your potential eligibility for this program, you should assess, to the best of your ability, your own compliance record using the same criteria that EPA, along with its state partners, will use. These screening criteria are listed below. In addition, and as noted above, a condition for entry into the Achievement Track program is that your facility is currently in compliance with all

applicable federal, state, tribal and local environmental requirements, and you will maintain compliance for the duration of your participation in the Achievement Track. Therefore, you should be familiar with and consult relevant EPA policy, guidance, and interpretation of legal requirements that apply to your facility when assessing your past record and current compliance status.

Lastly, when you sign the Statement, you are confirming that you are the senior facility manager and, on behalf of the corporation or other legal entity that owns or operates your facility, you are fully authorized to submit the Application, execute the Statement, and participate in the Achievement Track Program.

Screening Criteria

Participation in the Achievement Track will not be appropriate if the compliance screen shows any of the following, under federal or state law:

- Corporate criminal conviction or plea for environmentally-related violations of criminal laws involving the corporation or a corporate officer within the past 5 years
- Criminal conviction or plea of employee at the same [the applicant's] facility for environmentally-related violations of criminal laws within the past 5 years
- Ongoing criminal investigation/prosecution of corporation, corporate officer, or employee at the same facility for violations of environmental law
- Three or more significant civil violations at the facility in the past 3 years³
- Unresolved, unaddressed Significant Non-compliance (SNC) or Significant Violations (SV) at the facility
- Planned but not yet filed judicial or administrative action at the facility
- Ongoing EPA- or state-initiated litigation at the facility
- Situation where a facility is not in compliance with the schedule and terms of an order or decree

In addition, EPA may also consider whether there are significant problems, or a pattern of non-compliance, in an applicant's overall civil or criminal compliance history.

³The term “significant” with respect to violations or non-compliance refers to how the violation is characterized under the applicable media enforcement response policy, available at www.epa.gov/oeca/main/strategy/.

Submitting the Application

Submit your completed application and any attachments to:

The Performance Track Information Center
c/o Industrial Economics Incorporated
2067 Massachusetts Avenue
Cambridge, MA 02140

If you have any questions concerning the application process or the program in general, you can call the Performance Track Information Center toll-free at 1-888-339-PTRK (7875).

Once you submit an application, EPA will conduct a preliminary review to determine that it is complete and notify you that the substantive review has begun. The substantive review to evaluate a facility's eligibility will be conducted by an EPA committee made up of representatives from EPA headquarters and regional offices. Through the appropriate regional office, EPA will consult with the state in which the facility is located to help determine the facility's eligibility for the program.

When a facility is accepted, it will receive standard written notification from EPA. Facilities that are accepted will be in the program for a period of three years, which is the standard term for participation in the Achievement Track. Accepted facilities will also be announced on the National Environmental Performance Track web site. Those not accepted will receive a brief explanation for EPA's decision.

National Environmental Achievement Track

Environmental Requirements Checklist

The following *Checklist* is provided to assist facilities in answering *Section A, Tell us about your facility, "Question 6.* The *Checklist* is given to help facilities identify the major federal, state, tribal, and local environmental requirements applicable at their facilities. The *Checklist* is not intended to be an exhaustive list of all environmental requirements that may be applicable at an individual facility. .

If you use this *Checklist* and choose to submit it with your application, fill in your facility information below and enclose the completed *Checklist* with your application (see instructions).

Facility Name: _____

Facility Location: _____

Facility ID Number(s): _____
(attach additional sheets if necessary)

3. Chemical Substances Inventory Reporting Requirements (40 CFR 710)
4. Chemical Information Rules (40 CFR 712)
5. Health and Safety Data Reporting (40 CFR 716)
6. Pre-Manufacture Notifications (40 CFR 720)
7. PCB Distribution Use, Storage and Disposal (40 CFR 761)
8. Regulations on Use of Fully Halogenated Chlorofluoroalkanes (40 CFR 762)
9. Storage and Disposal of Waste Material Containing TCDD (40 CFR 775)

Other Federal, State, Tribal or Local Toxic Substances Regulations Not Listed Above (identify)

10. _____
11. _____

Pesticide Regulations

1. FIFRA Pesticide Use Classification (40 CFR 162)
2. Procedures for Disposal and Storage of Pesticides and Containers
(40 CFR 165)
3. Certification of Pesticide Applications (40 CFR 171)
4. Pesticide Licensing Requirements
5. Labeling of Pesticides
6. Pesticide Sales, Permits, Records, Application and Disposal Requirements
7. Disposal of Pesticide Containers
8. Restricted Use and Prohibited Pesticides

Other Federal, State, Tribal or Local Pesticides Regulations Not Listed Above (*identify*)

9. _____
10. _____

Environmental Clean-Up, Restoration, Corrective Action

1. Comprehensive Environmental Response, Compensation and Liability Act (Superfund) (*identify*)

2. RCRA Corrective Action (*identify*)

Other Federal, State, Tribal or Local Environmental Clean-Up, Restoration, Corrective Action Regulations Not Listed Above (*identify*)

3. _____
4. _____

Environmental Performance Table

Select aspects from this table in completing Section C, "Tell us about your past achievements and future commitments."

Categories	Aspects	Measures
ENERGY USE	Total Energy Use	BTU, MMBTU
WATER USE	Total Water Use	gallons
MATERIALS USE	Total Materials Use	tons, metric tons
	Hazardous Materials Use	tons, metric tons
	Recycled/Re-Used Materials Use	tons, metric tons
AIR EMISSIONS	Emissions of Greenhouse Gases	tons, metric tons carbon-equivalent of CO ₂ , CH ₄ , N ₂ O, and halo-carbons
	Emissions of Ozone-Depleting Chemicals	pounds, tons
	Emissions of VOCs	tons, metric tons
	Emissions of NOx	tons, metric tons
	Emissions of Sulfur Dioxide	tons, metric tons
	Emissions of Particulate Matter	tons, metric tons PM10 and PM2.5
	Emissions of Carbon Monoxide	tons, metric tons
	Emissions of Toxics	pounds of chemicals listed as toxic under CAA, TRI and State statutes, also HPV and PBT
WASTE	Total Solid Waste	tons, metric tons (including production scrap, if not recycled/reused)
	Hazardous Solid Waste	tons, metric tons
	Toxic Releases to Land	tons, metric tons TRI, HVP, PBT chemicals

DISCHARGES TO WATER	COD Discharges to Water	pounds
	BOD Discharges to Water	pounds
	Discharges of Toxics to Water	pounds of chemicals listed under CWA, TRI, HPV, PBT, State statutes
ACCIDENTAL RELEASES	Release History	number, quantity of RQ, accidental releases reportable under EPCRA
	Vulnerability and Potential for Releases	size of Vulnerable Zone per Off-Site Consequence Analysis
		volume of Extremely Hazardous Substances in inventory
PRESERVATION/RESTORATION	Habitat Impacts	destruction, degradation, creation, or enhancement of habitat, including wetlands, riparian areas
PRODUCT PERFORMANCE	Expected Lifetime Energy Use of Product	KWh, BTU
	Expected Lifetime Waste (to air, water, land) of Product	tons, metric tons, by aspects in air, waste, water categories above
	Packaging Materials Used in Product	tons, metric tons
	Waste to Air, Water, Land from Disposal or Recovery of Product	tons, metric tons, by aspects in air, waste, water categories above

The following acronyms are used in the *Environmental Performance Table*

BOD	=	Biological Oxygen Demand
CAA	=	Clean Air Act
COD	=	Chemical Oxygen Demand
CWA	=	Clean Water Act
BTU	=	British Thermal Units
EPCRA	=	Emergency Preparedness and Community Right-to-Know Act

HPV	=	High-Production Volume Chemicals (a list of chemicals covered by HPV is available at http://www.epa.gov/chemrtk/hpvchmlt.htm
KwH	=	Kilowatt Hours
PBT	=	Persistent, Bio-accumulative, and Toxic Chemicals (a list of chemicals covered by PBT is available at http://www.epa.gov/tri/pbtrule)
MMBTU	=	Million Metric British Thermal Units
PM10	=	Particulate Matter less than 10 microns
PM2.5	=	Particulate Matter less than 2.5 microns
RQ	=	Reportable Quantity under the Comprehensive Environmental Responsibility and Cleanup Act (CERCLA)
TRI	=	Toxic Release Inventory (a list of chemical covered by TRI is available at http://www.epa.gov/tri/chemical)
VOC	=	Volatile Organic Compounds
